Report

OF THE

One Hundred and Fifty-first Annual Meeting

OF THE

CONTRIBUTORS TO THE PENNSYLVANIA HOSPITAL

PENNSYLVANIA HOSPITAL, 5th mo. 5th, 1902.

At the one hundred and fifty-first Annual Meeting of the Contributors to the Pennsylvania Hospital the day and year aforesaid, Joseph G. Rosengarten was called to the Chair, and John T. Lewis, Jr., was appointed Secretary.

The minutes of the last meeting were read and approved.

The Annual Report of the Board of Managers was read by John B. Garrett, which was accepted and referred to the incoming Board to print such matter as they may deem expedient.

The Annual Report of the Department for the Insane was read by James T. Shinn, which was accepted and referred to the incoming Board to print as much of it as they may think proper.

The Report of the Committee to investigate the advisability of changing the charter of the Corporation was read and accepted. Report is as follows :

“ To the Contributors to the Pennsylvania Hospital :

“ At your last annual meeting, held May 6th, 1901, it was by you resolved upon motion that the question of securing an amendment to the charter providing for the election of the Managers in groups of four to serve for three years be referred to the incoming Board, to report at the next meeting or at a special general meeting to be called for the purpose of considering their report thereon, as they may deem best.

“Pursuant to your instructions thus given, your Board, at their monthly meeting on the 24th day of June, 1901, after a protracted discussion of the questions embodied in the above resolution, resolved that the same should be submitted to the counsel of the corporation, with a request that he would advise the Managers of his ‘opinion of the disadvantages that are possible in the acceptance of the provisions of the present Constitution of the State of Pennsylvania, in order to introduce the proposed change in the mode of election of Managers.’ Pursuant to the last above recited resolution, the question was by your Secretary duly submitted to J. Rodman Paul, Esq., Solicitor for the Corporation, whose report thereon was submitted at the monthly meeting of the Board of Managers held December 30th, 1901.

“After a proper consideration of the exposition of the law as contained in the opinion of Mr. Paul, your Board has reached the unanimous opinion that it would be extremely unwise to in any wise interfere, with a view to alteration or amendment, with the present charter of your institution.

“All of which is respectfully submitted.

Joseph B. Townsend, Jr.

Henry H. Collins.”

The Chair read the following, which was unanimously adopted :

“At the Annual Meeting of the Contributors held May 5th, 1902, it was, on motion, *Resolved*, That this Meeting desires to place upon its Minutes its sense of the loss to this Hospital as well as to the City of Philadelphia, in the death of the late Frederick Fraley, who for many years testified his interest in this Hospital by presiding over its Annual Meetings, and showed in this as in his whole long and honored life his good citizenship and his devotion to all Philadelphia interests.”

On motion, the meeting adjourned.

JOSEPH G. ROSENGARTEN, *Chairman*.

JOHN T. LEWIS, JR., *Secretary*.

Pennsylvania Hospital.

At the 151st Annual Meeting of the Corporation, held 5th month 5th, 1902, the following contributors were elected to serve for the ensuing year :

MANAGERS.

BENJAMIN H. SHOEMAKER,	JOHN T. LEWIS, JR.,
T. WISTAR BROWN,	JOHN S. JENKS,
CHARLES HARTSHORNE,	JOSEPH E. GILLINGHAM,
JAMES T. SHINN,	ARCHIBALD R. MONTGOMERY,
JOHN B. GARRETT,	HENRY H. COLLINS,
JOHN W. BIDDLE,	JOSEPH B. TOWNSEND, JR.

TREASURER.

HENRY HAINES, 514 Walnut Street.

At the first meeting of the Managers the Board unanimously elected

BENJAMIN H. SHOEMAKER, *President.*

JAMES T. SHINN, *Secretary.*

STANDING COMMITTEES.

Assistant Superintendent of Nurses, ALICE M. GARRETT.

Report of the Board of Managers

TO THE

CONTRIBUTORS

AT THEIR

151st Annual Meeting, held Fifth month 5th, 1902.

The year just closed is less notable than its recent predecessors for new construction on the premises occupied by the Hospital for the relief of the sick and injured. What work of this sort has been done has not added to the capacity of the Hospital, but to the improvement of sanitary conditions and to the facilities for economical administration.

A Garbage Destructor was installed at a cost, for furnace of \$1,600.00, and for vault of \$2,100.00, whereby the refuse of the establishment is burned daily by an odorless process, at an expense for fuel of about 40 cents per day.

A Cold Storage plant, estimated to cost about \$10,000, the gift of one of the Managers, is in process of construction. This will provide separate rooms for storage of meats, milk, potatoes and of other household supplies, and a butter and egg box, all cooled by brine coils. It will supply an imperative need which has greatly increased with the increase of population on the premises in the past few years, not only for the avoidance of waste of perishable articles of food, but to enable their purchase in such quantities and at such times as true economy demands. Machinery will be provided of sufficient capacity to manufacture ice if found desirable in the future.

No changes have occurred during the year in the Chief Medical and Surgical Staff of the Hospital.

Dr. Harvey B. Shoemaker has resigned his position as one of the Medical Staff of the Out-Patient Department, and Dr. Charles D. Hart has succeeded him.

Dr. Warfield T. Longcope has been appointed Resident Pathologist, assisting Dr. Simon Flexner in the Clinical Laboratory. In order to give to all our resident physicians the advantage of pathological study and practice, and to increase the efficiency of the laboratory as an aid to intelligent medical treatment in the wards, each of the residents in turn now devotes three months of his two years' residence in the Hospital to service in the laboratory. As prolongation of the term appeared impracticable, it was found necessary to sacrifice the experience in the study of nervous diseases and in pharmaceutical work which has recently been obtained in three months' residence in the Department for the Insane. The change was made with some reluctance on the part of the Managers, and it is hoped some re-arrangement of the residents' work may hereafter be effected whereby all these benefits may be assured to them.

The work of the Ayer Clinical Laboratory during the past year has abundantly proved its usefulness. It has covered the entire field of Hospital Laboratory examinations. The main purpose of the Laboratory is to assist in the diagnosis of obscure diseases. Examination of blood, secretions and sputa, and of the material from the surgical operating room, is systematically and regularly carried out, and prompt reports have been issued. An accurate record of the examinations made and their results has also been kept from which, in time, valuable data may be compiled.

Number of Clinical examinations, including	
Blood, Clinical Bacteriology and Surgical	
Pathology	3,487
Number of Urine examinations	5,400
Total	<u>8,887</u>

The means of speedy communication with the several Medical and Administrative offices, including

the Out-Patient Department, Nurses' Home at Eighth and Spruce Streets, Ambulance Stable and Carpenter Shop, which are outside the block on which the main Hospital buildings stand, has been secured by establishing a local Telephone Exchange in the office of the Superintendent. Thirty stations within the Hospital premises are thus brought into communication with the Office and with one another, and with the public service of the Bell Telephone Company.

A new and improved ambulance is being built, to meet the largely increased demand upon this service. During the year 1,597 trips have been made by our own ambulances, and 2,239 trips to the Hospital have been made by the Police Patrol of the city.

The one just closed being the first whole year since the completion of the enlargement and re-organization of the Hospital, begun nearly ten years ago, the following comparisons of work and expenses are worthy of careful consideration :

During the past year the number of ward and private patients under treatment was 4,705, an increase of 702 over the year preceding, and an increase of 2,535 over the year 1891-92; or 117 per cent. in ten years. The number of patients admitted during the past year was 360 more than ever before.

The daily average number of patients was 251, an increase of 20 over the preceding year, and 108 over the year 1891-92.

The number of Hospital days was 91,504, an increase of 7,127 over last year, and 39,173 more than ten years ago.

The number of cases admitted to the Receiving Wards, of whom 4,435 were sent to the wards, was 23,142, an average of 63.4 per day. This was an increase in the number over last year of 2,781, and in the daily average of 7.6. The number admitted to the Receiving Wards ten years ago was 5,481, to which should be added 1,002 medical cases taken directly to the wards, making a total of 6,483 as compared with 23,142 the past year.

The number of cases treated in the Out-Patient Department was 16,234, an increase of 1,354 over the year preceding, and 6,709 more than ten years ago. The total number of visits to the Out-Patient Department was 58,727, as compared with 54,295 last year and 28,982 in 1892.

The total number of cases treated was 39,646, of whom 141 were pay patients. This is 4,131 more than last year and 23,210 more than ten years ago. The admissions to the Receiving Wards alone have averaged a case every twenty-three (23) minutes night and day throughout the year; and counting new patients and re-visits in Receiving Wards and Out-Patient Department, the Physicians have made 83,515 examinations, besides attending 251 ward patients daily.

At one time, 301 patients were in the wards, a larger number than ever before except for short periods during the Spanish-American War, when the numbers were swelled by military cases.

The cost for maintenance the past year has been \$126,020.41, an increase of \$4,506.51 over the year preceding. But with this increase in the total expenditures, the cost per capita per diem is slightly less, being \$1.24 for the year just closed compared with \$1.29 last year. And with all the increased facilities it is no higher than ten years ago.

The cost of unprepared food supplies is also less, being 45 cents per day for each patient as compared with 47 cents. The cost for each inmate was 25 cents.

This decrease in the per capita cost for the year is the result of larger numbers, as the cost of most supplies was higher than the year before.

There has been a considerable saving in the Drug Department, but all the other departments show an increase. Meat, Coal and Special Nursing are the items showing the largest increase.

The recent high prices in provisions, which still obtain, and the advance in cotton goods, must undoubtedly affect our accounts for the coming year.

The prevalence of small-pox in the city during the autumn and winter of 1901-2 was the cause of much solicitude to the Managers and to the Medical and

Administrative Officers of the Hospital. Upwards of twenty cases found their way within our entrance gate, many in a condition to render immediate diagnosis difficult. A room was made ready near the gate to which all suspicious cases were assigned, and from which such as proved to be small-pox were promptly removed to the Municipal Hospital. We thankfully acknowledge that through the intelligent care of the physicians, under Divine blessing, the disease was not extended to our wards, and it was not found necessary at any time to curtail the ordinary privileges of visitors to the patients.

PATIENTS IN THE PINE STREET HOSPITAL FOR THE SICK AND INJURED.

New patients received in the wards	4,435
Patients remaining May, 1901	270
Total number treated in wards	4,705
Patients remaining May, 1902	265

RECEIVING WARD.

Number of cases admitted	23,142
Of these 4,435 were transferred to the wards of the Hospital.	

OUT-PATIENT DEPARTMENT, OR DISPENSARY.

Number of new cases treated : Surgical, 10,379 ; Medical, 2,046 ; Eye, 1,864 ; Ear, 654 ; Nose and Throat, 885 ; Gynecological, 377 ; Mental and Nervous, 29 ; Total, 16,234.

Total number of cases treated in the Wards, Receiving Wards, and Out-Patient Department of the Pine Street Hospital, 39,646.

Sixteen pupils of the Nurses' Training School have been graduated during the year, viz :

Mary Ettinge Baker,	Cora M. McNinch,
A. Gertrude Beck,	Annie Jessie Montgomery,
Sarah Dewey Boyer,	Lillie Sheldrake Norton,
Mary Parnell Hardy,	Nellie Fisher Rayer,
Roxana May Kanagy,	Rose Ann Rhoads,
Mary Moffatt Kennedy,	Annette Shertzer,
Emilia Agnes Leser,	Lillian Margaret Smith,
Jessie Margaret Lynch,	Mabel Ralston Spahr.

The visits of the Ladies' Committee and of the band of self-sacrificing men who have conducted religious services with the patients during many preceding years, have been continued to the satisfaction of the Managers.

A valuable addition to the portrait gallery of the Pine Street Hospital has been made, in a painting by Miss Van Trump of the eminent Surgeon, Dr. D. Hayes Agnew, long an honored member of our Surgical Staff.

The Managers have been informed of a bequest of \$10,000.00, to be received from the estate of George W. Farr, Jr., recently deceased, and of valuable interests in the estate of L. Taylor Dickson and J. Alfred Kay, the amounts of which have yet to be determined. They have also received the following during the past year:

From Estates of

Esther Fisher Wistar	\$35,000 00
Mahlon H. Dickinson	5,000 00
Dr. J. M. Da Costa, for Free Bed in Medical Ward	4,762 50
Israel Fleishman	2,044 97
Henry M. Phillips	2,000 00
Charles E. Moffett	750 00
Elon Dunbar, for Department for Sick and Injured	370 00
Elon Dunbar, for Department for Insane .	370 00
Mordecai D. Evans	225 10
Catharine W. Thorn, refund of succession tax	225 00

And contributions from

Joseph E. Gillingham, on account of Memo- rial Building	14,000 00
Misses Blanchard, for Free Bed in Insane Department	10,000 00
T. Wistar Brown, for Free Bed in name of Esther Fisher Wistar	5,000 00
Joseph B. Townsend, Jr.	100 00
Joseph G. Rosengarten	50 00
Lawrence J. Morris	50 00

Charles P. Perkins	\$50 00
Charles E. D'Invilliers	30 00
Dr. Charles D. Hart	30 00
Samuel L. Fox	30 00
Mary Hutchinson Lovering	30 00
Joseph Shallcross Lovering	30 00
Geoffry Story Smith	30 00
Franklin B. Kirkbride	30 00
R. Francis Wood	20 00
Percival Nicholson	30 00

The aggregate amount of legacies received, as above, is \$50,747.57, and of contributions \$29,510.00. For these and other practical evidences of the continued interest of the community in the benevolent purposes of the Pennsylvania Hospital, and in its successful administration, the Managers would express their sincere gratitude. The income from its invested endowment falls far short of meeting the cost of maintenance and operation on a basis of strict economy and prudence, and its charitable work would necessarily be greatly curtailed were it not that He who said, "the poor ye have always with you," mercifully turns the hearts of His children to the work conducted in His name, and has abundantly blessed it.

The enlarged accommodation for sick and injured patients has nearly doubled the expense of maintenance and operation as compared with ten years ago. The abnormally high cost of provisions and fuel, now current, impose a considerable further burden. We cannot too strongly urge upon the friends of the Hospital the importance of such addition to its permanent funds as will relieve our successors, if not ourselves, from anxiety as to the sources of support of so noble a charity, in which the health and welfare of so large a portion of the poor around us are involved.

The farms near Newtown Square, in Delaware County, have supplied to the various departments of the Hospital produce valued at \$17,111.99. This consisted of 318,384 quarts of milk, 617 bushels of potatoes, 4 cords of wood,

43½ tons of hay, and a small quantity of corn. The farms also contributed largely, as in previous years, to the pleasure and improvement in health of convalescing patients who have suffered from mental disease.

STATISTICS OF DEPARTMENT FOR THE INSANE, WEST PHILADELPHIA.

Number in Hospital 4th month 25th, 1901	443
Admitted during the year	191
Whole number treated	634
Discharged	183
Remaining 4th month 24th, 1902	451

The cost of this benevolence has been :

At the West Phila. Hospital for Men	\$94,752.53
“ “ “ “ “ Women	132,684.90

Making a total of	\$227,537.43
-----------------------------	--------------

It is estimated that the sum of \$63,150.40 has been expended upon patients paying only part of the cost of support or not paying anything.

There has been constructed at the Department for Insane Women, at a cost of about \$20,000, defrayed by a Manager, Joseph E. Gillingham, a building in memory of his wife, Clara Donaldson Gillingham, which will prove a valuable addition to the means of promoting the health, pleasure, and comfort of patients. It is also architecturally a valuable addition to the group of buildings at that Department. It is located directly west of, and about 300 feet from, the main western entrance to the Hospital, and contains a large swimming pool, baths, rooms for massage treatment, etc.

For a more detailed description of this building, and for information regarding the year's work at the Departments for Insane Men and Women, we take pleasure in referring to the accompanying report of Dr. John B. Chapin, Superintendent and Physician-in-Chief.

The Managers gratefully acknowledge the unselfish devotion and efficient service of the various officers and employees of the several Departments of the Hospital during the past year.

The commemoration of the foundation of the Hospital upon its 150th anniversary, the eleventh day of May, 1901, was attended by appropriate exercises at the original location in the presence of large numbers of contributors and friends. A week later, the event was further celebrated at the Departments for the Insane, which were opened to the inspection of a large company. A full account of these interesting occasions having been widely published, this simple record is all that historic accuracy requires.

By order of the Board of Managers.

BENJAMIN H. SHOEMAKER,
President.

JAMES T. SHINN,
Secretary.

 daily copies.

Statistics

SHOWING THE NUMBER OF PATIENTS TREATED, THE COST
OF MAINTENANCE, ETC., FOR THE YEAR ENDING
FOURTH MONTH 26TH, 1902.

Number of patients remaining in the Hospital Fourth Month 27th, 1901—pay, 9; free, 261; total	270
Patients admitted during the year—pay, 141; free, 4294; total	4,435
Total number treated in the Wards during the year	4,705
Number of patients treated in the Receiving Wards and not remaining in the House . .	18,707
Number of out-patients treated during the year	16,234
Total number of patients treated	39,646
Number of patients remaining in Hospital Fourth month 26th, 1902—pay, 10; free, 255; total	265
Average daily number of patients maintained in the Wards—pay—6.47; free, 244.55; total	251.02
Average stay of each patient, days	19.44
Cost for maintenance of in- patients	\$114,020 41
Approximate cost of out- patient service	12,000 00
Total expense for the year	\$126,020 41
Average cost per day for each in-patient . . .	\$1 26
Average expense to the Hospital for each out- patient	34

Of the patients discharged			
The number cured was	.	.	2,865
“ “ relieved	.	.	1,002
“ “ removed without material im-			
provement	.	.	123
“ “ died	.	.	450
			<hr/> 4,440

Of the 450 deaths, 100 died within twenty-four hours after admission.

Since the foundation of the Hospital, in 1751, there have been admitted to beds in the wards 156,030 patients, of whom 111,751 were poor persons, supported at the expense of the institution.

Of these 156,030 patients there have been :	
Cured	105,282
Relieved or improved	26,047
Left the Hospital without material improvement	9,283
Died	15,153
Remaining	265
<hr/> 156,030	

Since the re-organization of the Out-Patient Department in 1872 there have been treated 234,435 out-patients, making 877,788 visits.

TABLE SHOWING NATIVITY OF PATIENTS ADMITTED DURING THE YEAR :

BORN IN FOREIGN COUNTRIES.

Admitted into the Department in West Philadelphia since its opening in 1841	11,332
	<hr/>
Total	15,692

Of the patients discharged “recovered,” eleven were residents of the Hospital less than one month; twenty-one between three and six months; four between six months and one year; and two for more than a year.

Of those discharged “much improved,” three were under treatment less than three months; thirteen between three and six months; six between six months and a year; and five for more than a year.

Of those who “died,” five were in the house less than one month; four between three and six months; eighteen for a period longer than a year; one had been a resident of the Hospital continuously for twenty-five years; one for thirty-two years; and one for forty-eight years.

The whole number of patients treated during the year was above the usual average. The percentage of recoveries on admission of new cases was twenty-three. This is below the average of the past ten years, which has been thirty per cent. The number of fresh cases admitted during the year was slightly below that of the previous year, while the daily average number of patients in the Hospital was greater.

The diminution in the number of recoveries is ascribed to the admission of an increasing proportion of patients advanced in life, an unusual number suffering from chronic mental disease, organic disease of the brain and nervous system, who have been brought to our Hospital as a last refuge to receive care, though they have presented no prospect of recovery. Prior to admission all of these cases had received medical treatment at their homes, and had had the consideration of the Attending Managers.

DEPARTMENT FOR WOMEN—THE VILLA

It has been an interesting experience of the year to note that fourteen patients suffering from neurasthenic conditions, with impaired physical health, threatened with mental disease, voluntarily sought admission to the Hospital. If it were not for the unfounded and unwarranted prejudice existing toward hospitals for the insane, which even our laws indirectly foster, together with a disposition to conceal what is sometimes considered a blot on the family, there is no doubt that the number of voluntary admissions and recoveries would increase. There is no doubt that many suicides and other unfortunate experiences and calamities would be avoided. A request for voluntary admission indicates confidence in the Hospital as well as a need of help. It implies a probability that there will be a coöperation on the part of the patient in the course of treatment. The proceeding has also the sanction of our State law. If the movement of the present year should be emphasized by an increasing number of similar applications, there will come a question whether the Hospital has any special duty to a class who are on the very threshold of insanity, and how it can be best discharged. Neurasthenic and nervous invalids are often required to leave comfortable homes and live elsewhere while undergoing medical treatment. They will resort to so-called sanatoriums and other places, some of which are well enough conducted, but they are not well placed even there. They hesitate to enter a hospital for the insane, admission to which is hedged about with legal requirements, implying often mental incapacity. Were it not for these, such patients could be best managed in many of the hospitals of our country as now conducted. Many cases such as we are now considering have been held in abeyance by the family physician, within our knowledge, awaiting a time when mental manifestations would be so pronounced that an unquestioned agreement would warrant any proceeding—a delay often working great detriment to the patient. Such a special department, if ever created, would be more favorably located elsewhere than in immediate proximity to a hospital ; would prove to be

an important and enlarged adjunct to its work, and be favorably regarded by the medical profession. Every voluntary admission to a hospital for treatment is a plea for the establishment of such a department.

The average number of weeks the patients who were discharged "recovered" were under treatment in the Hospital was fourteen. This is a reduction, as compared with previous years.

The medical service has been performed by five physicians, who have made two regular visits to the wards daily. The number of attendants employed in the nursing service is one hundred and fifty-four. The number of visits made by relatives and friends of patients during the year exceeded 10,900—a statement which should amount to something in dispelling any impression that may exist that they are kept behind inaccessible doors. On the contrary, it shows that a keen interest is alive to their welfare.

From the Report of the Steward, which is appended to this Report, it appears that the receipts for board and medical care of patients was \$214,014.46; from interest from legacies and all other sources, \$12,687.63, making a total of \$226,702.09. The amount expended for maintenance, wages, and all other purposes was \$227,437.43. As will be observed in the annexed report of the Steward, all receipts are strictly applied to the support of this department of the Hospital, in accordance with a standard which it is thought best meets the wants of the majority of those intrusted to our care.

The whole number of weeks patients occupied beds, either free of charge or those partly endowed, was 1980. In addition to this, the number of patients admitted under special conditions, together with others previously admitted, who were cared for, and who paid a part of the cost of their support, was 333.

During the current Hospital year a building has been erected on a site west of the center buildings of the Department for Women adjacent to, but detached from, the two museum buildings. This noble gift to the Hos-

THE GILLINGHAM MEMORIAL BUILDING

pital is to be known as "The Memorial Building." In the vestibule two tablets are placed. On one is the following inscription :

ERECTED ANNO DOMINI
1902
BY
JOSEPH E. GILLINGHAM
IN MEMORY OF HIS WIFE,
CLARA DONALDSON GILLINGHAM.

On the other is inscribed the following dedication :

MEMORIAL BUILDING
DEDICATED TO
MEDICAL AND HYGIENIC TREATMENT
IN THE
DEPARTMENT FOR WOMEN
OF THE
PENNSYLVANIA HOSPITAL.

The purpose of the building is to furnish to patients of the Department for Women liberal facilities for the administration of hydro-therapeutic treatment, together with a variety of baths, all of which will greatly contribute to improve the hygienic condition of our patients. The building is faced with light buff-colored pressed brick with trimmings of granite. The roof is of Spanish copper tiles. The interior is faced throughout with white vitrified brick and cream-colored pressed brick, and the floor with blue-gray marble tiles. The building contains a room in which a high temperature can be attained; two apartments for spray and needle baths; a room equipped for a tub bath; a resting room; a lavatory; dressing stalls divided by marble slabs; and a pool guarded by rails, forty by twenty feet, with a depth varying from four to five feet. The pool is lined with white enamelled brick with a marble coping. Ample arrangements exist for warming water to any desired temperature. All

plumbing is of the best and in nickeled brass. The whole structure is a credit to the science of the architect and the art of the builder.

The Memorial Building with its appointments so well adapted to our needs will prove a valuable addition to the Hospital equipment. Long may it stand for more than to be gazed upon with admiration for its beautiful workmanship and proportions. How much more will it arouse our emotions and feelings as we contemplate through its suggestions the spirit of sympathy for the ills of life which seeks in practical ways to reach out a helping hand. Long may this building stand for the purpose of commemorating the one whose name it bears—whose benevolence and virtues will remain as a memory to cherish, and an example to emulate.

On the 11th of May, 1901, the Managers extended to the contributors and friends of the Hospital an invitation to unite with them to commemorate in a suitable manner the one hundred and fiftieth anniversary of the establishment of the Pennsylvania Hospital. On this occasion the exercises consisted of reading of lessons from the Scriptures; an address of welcome by the President; an address by John B. Garrett, and an inspection of all of the wards and departments of the Hospital at Eighth and Spruce Streets. The assemblage, numbering several hundred, was composed of contributors, friends of the Hospital, representative citizens of Philadelphia, and others connected with similar work in other cities and States. Letters of regret from physicians and alienists of Scotland, England, France, Italy, Germany and Russia, expressing much interest and sympathy in the anniversary, were received. On the 18th of May more than four hundred of the former company joined the Managers in a visit of inspection to all of the wards of the two Departments for the Insane in West Philadelphia. The occasion afforded an opportunity of a personal observation of the state of the Hospital plant and property, and could not have failed to impress upon the minds of the visitors that through all the changes and vicissitudes of a century

and a half the fact that the early principles and plans established by the founders had been adhered to with unwavering fidelity. The crowded wards of all the departments of your Hospital testify to the needs of such an institution, and the fact that it meets a want for which neither the government, the municipality, nor private benevolence have elsewhere made sufficient provision. Your Hospital still furnishes to generations that are to follow a hope and promise of alleviating according to its means the ills that are incident to human existence. It was a fitting occasion to indulge in retrospection, as well as to consider the present and future outlook which the general awakening of interest in all social and scientific operations naturally suggests in the opening years of a new century.

A department for mental cases was ingrafted originally in the Act of Incorporation passed in 1751, as an important and co-equal part of the work originally contemplated. In the extent of its plant; in its work done for charity; in its influence in past years upon the subject of the humane care of the insane, and the organization of new hospitals throughout the country at a period when there was little knowledge or experience to guide, the Contributors and Managers have reason to be gratified and thankful for its record of good works. In these respects the results will not suffer in comparison with those of other hospitals engaged in similar work in this or other lands. What your Board and your predecessors have accomplished in the past has been limited necessarily to the means and to the times. All that could be desired has not been done. In constant touch with your work there seems to be much that remains to be done, as new wants are from time to time developed. The grounds, however, are beautiful, ample, and accessible to friends of patients. The buildings, which in their day were models to be studied and followed, are still, on the whole, in excellent condition, considering their age and the kind of usage to which they are subject. In the nursing service more than one hundred and fifty persons are employed.

In other departments, one hundred and thirty-one are engaged in various household duties incident to the administration. The elements composing the Hospital family, as its members come to us, cannot be said to be always coöperative or harmonious, but it is a part of the Hospital housekeeping and administration to adjust the inharmonious and discordant parts by classification so as to coördinate the whole to the medical ends and purposes of the Hospital—the restoration of all recoverables, the reëstablishment of orderly and normal habits of living in chronic cases, and to render the condition of all more tolerable. To this end every one employed in any and every relation to patients, from those engaged in positions of responsibility to the humblest in the service, should be impressed with a high sense of duty toward those under their care. They are instructed also in the practical school for service. There is no more essential qualification for the performance of any duty about a special or general hospital than the quality of sympathy for those in distress—the possession of which may even count for more than much technical knowledge without it.

May it seem pardonable, even at the risk of reiteration, to state anew the scope of the Hospital work, here and elsewhere? There has been a first and urgent need of immediate relief for the insane suffering from an acute attack. There has been a necessity of caring for the chronic and incurables who are dangerous or suicidal as well as those whose disorderly conduct destroys the home life or support of the family. These urgent and cogent reasons have been the impelling motive to create hospitals in the past, and will continue to have influence in the same direction in the future. In addition there has normally followed a rational basis for the medical treatment and care of the insane which has been evolved and formulated, founded closely upon personal observation, or what would in a general hospital be called clinical experience. Some, however, have been disposed to criticise, and others to scold, because of the lack of knowledge of mental pathology that prevails, and a failure to demon-

strate in some tangible manner the nature of that entity called the human mind. Nevertheless, the Contributors and Managers, so far as they are concerned, need not feel discouraged with the practical results and humane purposes of their Hospital, even admitting the truth of the allegation. The problems that surround the study of the faculties of the human mind in its normal state are still quite as much the subject of speculation, and no nearer solution than formerly. A similar statement relative to the disordered manifestations of insanity is equally true. Admitting the importance of clinical study, as it may be conducted in a general hospital, it is still a question to what extent a hospital of this character can be converted into an experimental station for scientific purposes alone. On the other hand, the scientific study of these cases should not be discouraged. The questions that may arise are within the scope of medical research wherever it can be properly conducted. While the medical treatment of insanity has made advances, and more patients are now cured than formerly in all of the hospitals,—due wholly to enlarged experience and observation of the insane,—it cannot be correctly stated that the better results have been due to pathological investigations. Little aid or contribution to the medical treatment of insanity (and we might make the statement even stronger) have been derived thus far from this source alone. The attempt to found a basis of mental pathology by cutting microscopic sections has thus far proved disappointing, notwithstanding the scientific zeal that has been expended in this direction. The negative results may, however, have served a good purpose in directing inquiry into more promising fields. The opinion expressed in a former report is strengthened, that investigations of this character, when undertaken, seem to promise the best practical results if conducted in connection with public hospitals. There patients can be observed clinically, as in a general hospital, by physicians familiar with the manifestations of the insane. In laboratories disassociated from the hospital there is too much tendency to begin investigation

after death has taken place. On new lines of study the psychological chemist will have an important part. Perhaps some portion of the munificent endowments made in recent years for scientific purposes and for the welfare of mankind, or a fund from some source not yet announced, may become applicable for the study of mental pathology. Perhaps nature may yet yield some of the secrets of the hard and complex problem.

While we ought to encourage and sympathize with a spirit of inquiry, there will still remain the always present duty of seeking the best methods of treatment and care of those intrusted to our care. Whatever pertains to hospital administration, its equipment, the best classification must still have the foremost place. We must seek, and heed as well, the teachings of experience to guide the future. The increase of means for comfortable living that marks the present age, the advantages to accrue from still further segregation and additional facilities for classification of patients, the erection of houses detached from the present Hospital buildings for the accommodation of convalescent patients preparatory to their discharge may well engage the sympathetic thought of those who are thinking of the future wants of this and other hospitals.

The Out-patient Department of the Hospital on Spruce Street, between Eighth and Ninth Streets, was regularly visited at three o'clock Monday and Friday afternoons by one of our staff for the purpose of giving advice to persons suffering from mental disease, or information relative to the Department for the Insane. The number of new cases was twenty-eight. The number of re-visits was eighty-nine.

The house on the Delaware County farm was open from June 15th to September 15th. The number of patients who spent a week and more there was sixty-nine. The number who visited for a day or longer was one hundred and three. This house has furnished an agreeable change, and every year has furnished some marked instance of recovery and improvement dating from the farm outing.

Following the long-established rule of many years' standing, some entertainment calculated to interest, occupy, or instruct such of our patients as could attend, has been arranged for every evening and afternoon excepting during the vacation months of summer. We have been aided in this by special contributions of money and service.

I have to thank the physicians, Drs. Nunemaker, Moulton, Josselyn and Phillips, and the steward, William M. Walter, for their coöperative services generally, and the physicians specially for oral instruction and lectures delivered to the nurses during this and preceding years.

I have to thank the matrons, supervisors, and all employed persons for faithful and willing service rendered during the year.

It has again pleased a number of friends of the Hospital to make contributions for the entertainment and diversion of our patients, which we desire to acknowledge with thanks, viz.:

To Mr. T. Wistar Brown, for \$100 for the Christmas holidays; to Mr. Joseph E. Gillingham, for \$100 for the Christmas holidays; to Mr. Walter Tomkins, for \$25 for the Christmas holidays; to the Misses Sterrett, for \$15 for the Christmas holidays; to Miss Anne Thomson, Mr. Clarke Thomson and Mr. Frank Thomson, for \$300; to Mr. John Story Jenks, for \$130; to a friend, for \$100; to a friend, for \$20 for clothing for indigent patients; to Mrs. Wistar Morris, for four boxes of shells and fossils; to Mr. James F. Wood, for loan of one hundred and fifty lantern slides; to the Franklin Fire Insurance Company, for two subscriptions to "Harper's Monthly Magazine"; to Mr. and Mrs. Charles E. School, for candy and books at Christmas; to Mrs. Spencer Miller, for Christmas cards; to Florence J. Heppe, for \$5 for the Christmas fund; to the publishers of "The White Ribbon," for six copies; to Mr. G. R. Onimus, for a barber's chair and mirror; to Mr. Paul B. Somers, for Christmas cards; to Mr. J. C. Ghenn, for an entertainment with phonograph; to Mr. Harry J. Abbott, for a gift of books. During the year

arrangements were made for eleven concerts; two chalk talks; one illustrated drama; four readings; one performance of necromancy, and four lectures.

The Hospital received during the year a portrait of Thomas Eddy, member of the Society of Friends, and a native of Philadelphia, who died in the city of New York in 1827. The whole of his active life was spent in charitable acts and works, in consideration of the welfare of the insane, children, Indians, and other distressed persons. The portrait is a gift from Mr. Joseph E. Gillingham, and, by direction of the Managers, was placed on the walls of the Hospital at the Department for Women.

I have to thank the Board for their kindly and sympathetic consideration of all the matters and concerns of this Department of your interesting work.

JOHN B. CHAPIN.

ADMISSION OF PATIENTS
INTO THE
Pennsylvania Hospital for the Insane^{*}
AT
PHILADELPHIA.

All classes of insane persons, without regard to the duration of the disease or its curability, are admitted into this Institution. Idiots, however, it may be stated, are not received; and for the epileptic a special agreement should be made.

Preparatory to the reception of a patient, it is necessary to arrange the rate of weekly charge with a member of the Board of Managers, † and to furnish a certificate of the patient's insanity from two physicians, both of whom must be residents of Pennsylvania, who shall have examined the patient within one week of its date, and the certificate shall bear date within two weeks of the admission of the patient, and the same shall be acknowledged and sworn or affirmed to before some magistrate or judicial officer [*but not before a Notary Public*], as required by an Act of the Legislature of Pennsylvania, approved 1883. An "Order for the reception of a patient" must be signed by a near relative or friend. Full and complete answers should also be given to questions in "Statement."

For the payment of board, and removal of a patient when discharged, security is always required from some responsible resident of the city of Philadelphia. Payment

^{*} *This is the only title of this institution, and the only proper direction for letters, etc.* Other names, occasionally used, are liable to make confusion, by confounding it with another institution in the same vicinity.

† The names of these gentlemen will be found in the front of this Report, and their places of residence can be learned on application at the Hospital, on Eighth Street, between Spruce and Pine, Philadelphia, where blank forms for physicians' certificates, bonds, etc., can always be obtained.

of board is always to be made quarterly in advance ; and if the patient is removed *uncured*, before the expiration of the first three months, and contrary to the advice and consent of the Superintending Physician, board is required for thirteen weeks ; otherwise the charge is only for the time actually passed in the Hospital, provided the time is more than four weeks.

Interest will be charged on bills not paid till after the expiration of the quarter.

Large chambers and private attendants can always be supplied, if desired by the friends of the patients.

A patient who is not a resident of this State, and other emergency cases manifestly insane, may be brought direct to the Hospital, where they may be received and remain till the necessary medical certificates and the approval of the Managers can be procured, provided this be done within forty-eight hours.

The following are the forms for physicians' certificates, order for the reception of a patient, and the bond that is to be executed before the order of admission is given :

ORDER FOR THE RECEPTION OF A PATIENT.

I, ———, the undersigned, hereby request you to receive ———, an insane person, as a patient into the Pennsylvania Hospital for the Insane, believing that such detention is necessary for ——— benefit. Subjoined is a statement respecting the said ———.

Occupation, ———.

Degree of relationship (if any) or other circumstances of connection with the patient.

Dated this ——— day of ———, one thousand nine hundred

To the Board of Managers of the Pennsylvania Hospital for the Insane, Philadelphia, Pa.

CERTIFICATE OF PHYSICIANS.*

We, the undersigned, residents of Pennsylvania, hereby certify that we have, within one week prior to the respective dates hereinafter mentioned, at _____, in the county of _____, separately examined _____ of _____, and do verily believe that the said _____ is insane, and that the disease is of a character of which, in our opinion, requires that the person shall be placed in a hospital or other establishment where the insane are detained for care and treatment.

We further certify that we have been actually in the practice of medicine for at least five years, and that we are not related by blood or marriage to the said _____, nor in any way connected as a medical attendant or otherwise with the Pennsylvania Hospital for the Insane or other establishment in which it is proposed to place the aforesaid.

_____, M. D.

Residence, _____.

Dated this _____ day of _____, one thousand
nine hundred

_____, M. D.

Residence, _____.

Dated this _____ day of _____, one thousand
nine hundred

CERTIFICATE OF JUDGE OR MAGISTRATE. †

I, _____, a _____ of _____ county, of the State of Pennsylvania, do certify that the foregoing certificate was duly ‡ _____ to before me, by the above-named _____ and _____ on this _____ day of _____, 190 , that the signatures thereto are genuine, and that the signers are physicians of good standing and repute.

_____ [L. s.]

* As required by the law of Pennsylvania, approved 1883.

† Certificate of a Notary Public will not be accepted.

‡ Sworn, or affirmed.

OBLIGATION.*

In consideration of _____ being admitted as a patient into the "*Pennsylvania Hospital for the Insane*," established and maintained by "The Contributors to the Pennsylvania Hospital," we do jointly and severally promise to pay to the Steward of the said Hospital, or to his order, quarterly, in advance, _____ dollars _____ cents per week, for board, and to provide or pay for all requisite clothing and other things deemed necessary or proper for the health or comfort of said patient; to pay for all glass or furniture broken or destroyed by said patient; to remove _____ when discharged; and if taken away *uncured*, against the advice and consent of the Superintending Physician, before the expiration of three calendar months, to pay board for thirteen weeks; or if removed, or discharged, within four weeks, with his approbation, to pay board for four weeks.†

Witness our hands the _____ day of _____, 190 .

_____ [L.S.]

_____ [L.S.]

The above preliminaries having been complied with, an order is given by a Manager, authorizing the Physician of the Institution to receive the patient.

Letters relative to the admission of patients into the Department for the Insane may be addressed to any of the Managers or to DR. JOHN B. CHAPIN, Pennsylvania Hospital for the Insane, Forty-fourth and Market Streets (West) Philadelphia, Penna. [4401 Market Street.]

Entrance to "The Department for Men," on Forty-ninth Street, between Market and Haverford Streets, or Forty-ninth and Market.

Entrance to "The Department for Women," on Market Street, corner of Forty-fourth Street, or 4401 Market Street.

* This obligation is to be signed by a responsible person. The surety to be a resident of the city of Philadelphia.

† If the patient recovers before the expiration of the period paid for, and leaves with the full approbation of the Physician, the excess is refunded, unless that time should be less than four weeks, for which period board is always required.

Out-Patient Department of Pennsylvania Hospital,
for Mental Disorders, corner of Spruce and Darien Streets,
Mondays and Fridays, 3 to 4 P. M.

Long Distance Telephone Connections :

Department for Men, Telephone number 4-25-67.

Department for Women, Telephone number, 4-25-72.

SUBSCRIPTIONS AND DONATIONS will be received by
any member of the Board of Managers, or by HENRY
HAINES, *Treasurer*, No. 512 Walnut Street, Philadelphia.

LEGACIES intended to promote the interests of the
Pennsylvania Hospital should be given in its corporate
name, viz.: I hereby give and bequeath to "THE CON-
TRIBUTORS TO THE PENNSYLVANIA HOSPITAL" and their
successors and assigns forever (if real estate) all that, etc.,
(if personal property) the sum of, etc.

LEGACIES intended for the Department of the Insane
should specify, in addition, "to be devoted to extending
or improving the accommodations, and for the care of
the insane."

Contributions of books, periodicals, pictures, engrav-
ings, curiosities for the museums, and whatever can tend
to interest or occupy the patients, are always thankfully
received.

Every contribution or legacy of \$10,000 adds one
FREE BED to the number already in use for indigent,
recent, and probably curable cases in the Department for
the Insane.
